400	61 x 2.89		2035 x 0.51				
500	61 x 3.23		1768 x 0.61				

The number of wires in columns 3 to 7 is free from obligation.

The VDE 0295 only lays down the maximum diameter of the single wire and the maximum resistance which is related to the cross-section.

Conversion AWG (28-16) into Metric Dim.: In US-American areas of influence and in the computer industry it is customary to define the dimensions of copper wires and strands in AWG(American Wire Gauge). The table shows bunched strands and wires acc. to VDE (regular typeface) in comparison with concentric AWG strands and AWG solid wires (boldface).
